The airwaves were busy as usual for the Halloween weekend. As you can see the mailbox was really overflowing this month. We have several new contributors here including Franz Bergman, Scott Gentry, Mike Pollock, Lee Reynolds, Ed Silvia, Mike Smith, Kirk Trummel, and Cheryl Warner. Welcome to all and thanks for your input.

DiLogs includes all logs received by the 20th of the month either via the PO Box or the ANARC BBS. Keep your loggings complete, brief, and legible using the format you see here.

the media report

That man about magazines, Harry Helms, had a nice piece in Nuts n Volts' October "Open Channel" column. Under the headline "Pirates Ride The Airwaves Again!", HH gave a thumbnail synopsis of the origin of Pirate Radio and several historical examples. Nicest touch: he gave ACE a real nice plug. Thanks, Harry.

You wanna get on the air - but can't face a big fine? Consider Part 15 broadcasting; read: "Adventures in Part 15 Broadcasting" by G Hostwriter. Not so much a novel as a primer, Hosty's book will walk you thru transmitters, antennas, studios and programming considerations. All the hints, kinks and tricks are discussed. An easy read, yet full of vital info. Order your copy for US\$10 ppd from: Bud Stacey, POB 907, Satsuma, AL 36572. [direct]

Announcing the 1993 Pirate Poll

Yes. I'm afraid that the time has come to start hyping the bejabbers outa the annual Poll. But you know what it's all about, so I'll cut it short. Vote for the three Best and three Worst stations in the following categories: (1) programming and (2) technical ability. That's a total of 12 votes possible per person - or only 6 if you don't wish to appear negative for whatever reason. Feel free to be a little creative - come up with other categories and Honorable Mentions. Votes will be accepted and accumulated from 01 Jan until and including 28 Feb 1994. During March we drink coffee and use the abacus a lot and in the April edition of VR we present the results - Your Favorites, picks and pans. No holds barred. That's what it's all about. Send your votes to me at the Belfast address or leave them in the [P]mail section of the ANARC BBS at (913) 345-1978. And thanks for your participation. I always enjoy this time of year...

I suppose everybody is just dying to hear how my little trip went. To put it mildly, it was interesting. On the down-side, I didn't get as much work as I'd expected. On the up-side, I got to meet some of my heros, new and old: the Huxley Famly Players and the now-famous Capn Eddy. Got home pretty much the same as I left it - but with a new toy for the moment: an Icom R1. The frequency range to size ratio is phenominal - you can literally carry all the communication you can handle in your shirt pocket! The manual is pretty clear; even I can understand the directions. But enough of that. The fact is the trip was over-all a good time. Even though my suitcase decided to check out the countryside for three weeks without me. But next time, maybe not by bus..?

Hey, didn't JD do a great job last month? I didn't recognize the column at all, but who sez it always has to look the same? Let's all give him a Big Hand. Be nice to him; he may be the one taking over the column if/when I decide to retire...Wasn't Halloween a blast? At one point there were three stations on at one time; and how about VoStench and He Man on opposite sidebands of 7415 at the same time? Looks like winter will be a lot of fun...Straight from the horse's mouth, so to speak: via the DXin' Grandma, Gigi Lytle, comes the info that KIWI is operating on 7445 and 7460 (both +/- 5 kHz); no power given. Much more moisture on the card and it would have been illegible. Don't ya love fountain pens...

An old idea seems to have come back to some semblence life. Some time back I suggested a Free Radio Defense Fund be established to collect donations to assist Operators who got into trouble with you-know-who. There was minimal interest: \$5.02 was raised. As you might guess, I let the matter drop. Recently there's a computer message proposing the same basic idea. Is there any support for the concept now, particularly considering the mega-fines levied in recent actions. Even if the Fund never held much money, to a "little guy" facing a Federal Bureaucracy anything would be a real help. Let me know what you think - Please..!

GRYPE LIST: again, this feature is supposed to be reserved for unanswered reports AT LEAST ONE YEAR old. However, I guess this one is close enuf for government work: New Jersey's Ed Rausch gripes about Pan Global Wireless' first broadcast on 7415USB, 26 Dec 92, 0040-0108 UTC. Sez he's sent at least one f/up report, too...And now MY list (oh boy, weren't you waiting for this?): KRUD - 7415 from July 1988; Voice of Radio Free Indiana - 7416.2 from November 1989; Radio Free Willy - 7415 from January 1990; CHGO - 7414.8 from August 1990; the inevitable Alliance For Free Radio - 7415.5 from August 1991; WNOT - 7415 from December 1991; WHIP - 7552 from April 1992; and WKIK - 7415USB from November 1992. All of these guys asked for reports and promised QSLs - but have not followed thru. Shame..!

Guy Connor, in Pennsylvania, tacked down a full data picture of Mrs Beasley from Mrs Beasley's Radio - 7413 signed by Mrs Beasley in about four months, a full data sheet (#325) from WLIS - 7465 signed by CP in about three weeks for a PiPa log, and a full data loose leaf sheet (#5) from WSM - 7415 in 22 days.

Bud Stacey, in Alabama, nailed up a "Calvin & Hobbes" sheet (#119) from ECBD - 7415 signed by ECBD & WFU2 in 364 days, a full data glossy white card from Omega Radio - 7461USB signed by Dick Tator in three weeks, a full data paper card from Bob Dylan Radio - 7465.8 USB signed by Bob Dylan in about two months, a full data card from The Radio Airplane - 7465USB signed by Capn Eddy in one month with stickers, etc., and a full data RUBBER CHICKEN (#450) from CSIC - 7413 signed by Rambo in six months - but worth the wait! [and real tasty fried in butter and covered with the right hot sauce! jta]

Scott Gentry, in Illinois, latched onto a partial data "Quality and Nutrition" sheet and a "New World Order" sheet from WEED - 7465USB in ten weeks, and a full data "He Man marries KK" sheet from CSIC - 7413 signed by Rambo in five months. [Scott: the QSL totals are just that - the total number of QSLs you have. Not this year, not since joining ACE; total! C U on the Scoreboard soon. jta]

Yo Lewis, also in Illinois, notched the radio with pride to show off four different full data sheets (#304, 307, 334, 340) from WLIS signed by CP for reports in DiaLogs, a full data "dead rock star" card (Bob Marley) from Altered States Radio - 7415 signed by William Hurt, a full data "He Man Jr ponders a deep thought" photo in 12 days for a report to DiaLogs, and a full data "wanted" sheet from RKNA - 7410 signed by Harry I Ball in 20 days.

Franz Bergman, in Wisconsin, plucked a pair of QSLs out of the mail: a full data card from Solid Rock Radio - 7465 in 27 days, and a full data card from Radio Airplane - 7465USB in 32 days with stickers and stuff.

Rob Keeney, in Kansas, scored a full data card from RBCN in 12 days, a full data photo of a "portable multi-element dipole antenna" (not!) from WORK in about two months, three full data cards (#78a, b & c) from NAPRS - 6295, 7410 and 7465 signed by Richard T. Pistek for various relays in two weeks.

John Cruzan, in Missouri, brags about a full data card from RBCN in about 25 days, a full data card from Omega Radio in about one month, a full data card from NAPRS in about 26.5 days for a Romantic Space Radio relay.

Martina Pappas, in frigid South Dakota, managed a full data "He Man marries Kristin Kaye" sheet (#478) from CSIC signed by Rambo in seven months.

Ed Kusalik, in Albrrrta, glommed onto a full data "Black Watch Pipe Band" QSL (#42) from CRSM - 7413 signed by Rob Roy in 58 days, a full data multi-color sheet (#56) from Romantic Space Radio via RU - 7415 signed by Arty in 47 days after f/up report, sheet from WEED - 7415 for various loggings, a full data red "scrotum self-repair" folder from Wire Line Radio - 7425 & 7461 signed by The Op in 14 weeks, and a full data studio card from WBZA - 25500USB signed by George Westinghouse, CEO, in one month;; card said farthest report!

Ye Olde Columniste snagged a full data paper card (#1) from Bob Dylan Radio - 7465.5USB signed by Bob Dylan in an uncertain length of time, a full data unsigned notebook page (#2) from WSM - 7413.4 in 23 days, a full data green poster stock sheet (#5) from Radio Free Salvation - 7470.0USB signed by Billy deYoung, pastor, in 6 days, a full data full color 11x17 sheet from RBCN - 15050USB signed by Radio Bob in 9 days, a full data orange sheet (#4) from Witch City Radio - 7435.0 signed by Ralph DeRosiers in 7 days, a full data "jack o'lantern on xmtr" photo card (#8) from Radio Halloween in 5 days, another "1993" card (#39) from RFM - 6295 signed by HV Short in 9 days, and a full data gold "map of NAM" card from NAPRS - 6295 signed by Richard T. Pistek, senior xmtr engineer, in about a week.

Until next, 73 and great DX from Oscar and Me...

Your loggings, information, and speculations about clandestine radio stations are always very welcome for this column. You can send them direct to your editor at 3492 West 123rd Street, Cleveland, Ohio 44111. Or, you can call (216) 941-3366 anytime, or else (216) 696-9077 on weekdays between 1300-2145 UTC. We have a wide range of interesting things to discuss this month.

WRMI FINALLY TRANSMITTING

We have discussed Jeff White's Radio Miami International operation in several prior Clandestine Profile columns. For some time he has been providing an outlet for numerous anti-Castro quasi-clandestine programs through bulk airtime purchase arrangements with licensed USA shortwave broadcasters. Jeff simultaneously has been constructing his own transmitter in southern Florida, primarily designed to broadcast the quasi-clandestine programming that has been brokered through Radio Miami International. There have been lengthy repeated delays in the startup of his new transmitter, which carries a WRMI callsign. For instance, at the 1992 Monitoring Times convention in Atlanta, WRMI's imminent plans for broadcasting were discussed at the convention's clandestine session. One year later at the 1993 Monitoring Times convention in Atlanta, the identical subject was discussed. During this twelve month interval, no WRMI broadcasting was heard.

ACE Publisher Rob Keeney of Kansas was among the first DX-ers to finally hear this station with actual activity. He logged WRMI at (and before) 2100 UTC on November 13. The station was transmitting a continuous test loop announcement on 9955 kHz. I thank Rob for his quick phone tip that allowed me to also catch this test. The announcement consisted of Jeff White reading a repeating loop of a little less than three minutes duration, with station ID's in English and Spanish followed by a test tone. Jeff announced that WRMI was testing. He invited reception reports via Post Office Box 526852, Miami, Florida 32152.

Rob Keeney called the station and spoke with Jeff, who indicated that this was the second test broadcast from the new WRMI transmitter. In "Fine Tuning" #714, longtime friend of ACE Mike Hardester of North Carolina says that he heard the earlier initial test at 2125 UTC on November 11 (also on 9955 kHz). Mike wrote in this month to say hello to all ACE members. He is reorienting his career at the moment after retirement from the military, and he probably will resume more active DX-ing when the dust settles. This fine WRMI catch indicates that for a currently intermittent DX-er, he's doing pretty well!

Jeff White has been a very good verifier of reception reports. However, the deadline for this month's ACE came prior to my receipt of a full WRMI schedule or a QSL. By next month we should have this information. In the mean time, 9955 kHz is a good spot to check out. It is possible that WRMI could be in full scheduled operation by the time that you read this.

Both Rob and I noted clearly audible signals from the WRMI test, but the station's signal strength was noticeably below average at my Cleveland QTH, particularly by the booming signal standards of most USA shortwave broadcasters. The WRMI test signal was clearly below levels that I usually hear from its adjacent channel anti-Castro clandestine peers, specifically La Voz

del CID on 9941.7 kHz and Radio Caiman on 9965 kHz. Jeff White indicated to Rob that we are hearing WRMI off the back end of the transmitter's directional beam heading, so the relatively modest signals are no great surprise.

As of November 21, both CID and Caiman are still subject to heterodyne noise jamming from Cuba. I noticed no jamming on 9955 kHz during the WRMI tests. But, once the station maintains regularly scheduled program broadcasts, it would surprise no one if a jamming transmitter appears on 9955 kHz.

As you check out this new station, let us know what you hear! I am sure that we will have an update on this evolving news in the January 1994 issue of "The ACE."

TRUMMEL FOLLOW-UP ON HAVRILKO JAMMERS

We are all pleased to hear from ACE member Kirk Trummel of Missouri. Several times in the past we have printed Vince Havrilko's logs of loud bubble jamming transmitters that he hears from his European QTH in Germany. These jammers are sometimes targeted at licensed broadcasters. But, more often than not, a loud bubble jammer in Vince's receiver is a good sign that a Middle Eastern clandestine station is operating underneath.

Kirk comments on a jamming signal that Vince heard on 7470 kHz at 1845 UTC. We ordinarily cannot hear either this jammer or its intended target on 41 meters from North America at our local early afternoon time of day. But, Vince speculated in the September ACE that the target of this jammer could be China, which Kirk admits is scheduled on this frequency at 1830 UTC in Italian to Europe.

On the other hand, Kirk Trummel reminds us that the clandestine station "Voice of the Mojahed, Sede-ye Mojahed" is simultaneously scheduled on this frequency at that time in Farsi. The clandestine uses 7470 kHz between 1400-1900 and 0200-0600 UTC, according to BBCMS information printed by Hans Johnson in his excellent October "Listener's Notebook" column in NASWA's "The Journal." It is possible (or maybe likely) that the clandestine (not China) is the target of Vince's bubble jammer.

Kirk accurately points out that this clandestine can be audible in North America at various times. The BBCMS data (via Monitoring Times) that Hans referred to in NASWA lists the station's schedule as 1400-1900 and 0200-0800 UTC on 5740, 5870, 6005, 6270, 6520, 6560, 6780, 7000, 7180, 7470, 8840, 9060, 9240, and 9640 kHz. They claim a television service at 1100 and 1930 UTC, but BBCMS does not indicate what channel is used. BBCMS speculates that the anti-Iran clandestine is "believed to emanate from transmitters in Iraq." The sponsoring organization is called "Mojahedin-e Khalq." I cannot confirm or deny that some of their broadcasts could be in Farsi, but BBCMS has logged them in "Persian."

Vince Havrilko sends in another batch of bubble jammer logs from Germany this month. All were heard on various mid-October dates on Vince's Japan Radio Corporation NRD-515. He heard jammers on 5740 kHz at 1843, 6510 kHz at 1801, 6770 kHz at 1801, 7000/7020 kHz at 1827, and 9240 kHz at 1849. All of these jammers match the aforementioned operating schedule for the Voice of the Mojahed.

Vince reports one additional bubble jammer on October 10 at 1635 UTC on 4650 kHz, which he speculates is targeted at an Iran/Iraq clandestine station.

LA VOZ DEL CID

In last month's column we discussed a Miami Herald newspaper article which claimed that there is a cash flow crunch at La Voz del CID, which could cause reductions in this anti-Castro clandestine's schedule. Vince Havrilko says that he still hears them well from Germany on 6305.7 kHz around 0700 UTC. I checked the bands at 1500 UTC on November 20 and around 0100 UTC on November 21 before typing this column. I found that CID's 9941.7 kHz signal is still there as usual. I still see occasional reports that they are using 11940 kHz. So, CID is still with us, despite the alleged drought in their bank account.

RADIO FREE BERKELEY

Last month we discussed local bay area FM pirates Radio Free Berkeley and San Francisco Liberation Radio. Although I do not believe that he is a member of ACE, we thank "Numero Uno" publisher and veteran DX'er John Herkimer of New York. He sent in an article about Radio Free Berkeley that appeared in the October 24 Sunday edition of the New York Times. You might want to check out this article at your local library.

The Times says that Radio Free Berkeley's operator, Stephen Dunifer, uses a mobile five watt transmitter that broadcasts into a ten foot antenna. Dunifer also promotes "micro-power broadcasting" by selling dozens of radio transmitter kits. Some of the kits are used by local FM pirates in Manhattan. Another one is used by "Ragged Mountain Liberation Radio," a mobile Connecticut FM pirate. Despite the fact that the FCC levied a \$20,000 fine against him, Dunifer continues his broadcasting activities. The Times says that Dunifer has future plans for operation of a powerful "short-wave apparatus of several hundred watts." If he does this, it obviously would considerably extend the range of Radio Free Berkeley. We ought to keep this in mind as a possible future pirate DX target.

Dunifer is an advocate for low power (e.g. 10 watt) community FM broadcasting. He opposes FCC policy that now precludes licensed low power FM broadcasting in the USA. The Times says that Radio Free Berkeley airs public service announcements for organizations such as a local bay area Unitarian church, so we properly should categorize the station as a pirate rather than a clandestine.

TWO EUROPEAN DX PUBLICATIONS

Andrew Yoder occasionally refers to the "Pirate Chat" Europirate bulletin in his ACE column. But, since ACE member Eric Suter of Virginia sent in a copy of their September 1993 issue, let me mention it here. The bulletin mainly covers medium wave, shortwave, and FM Europirate activity. There is a North American pirate column edited by our own Eric Suter. A few technical articles are sprinkled in. The September issue included plans for construction of a medium wave loop antenna, some schemes for homebrew FM antennas, and a two page analysis of medium wave propagation. Unlike ACE, Pirate Chat omits clandestine station coverage. Annual dues are £10 pounds sterling, with samples available for £1. The Pirate Chat address is 12 Dorman Road, Preston, England PR2 6AS, United Kingdom.

Another European bulletin is not very well known in North America: "Radio Von Unten." It bills itself as "the alternative media magazine." The publication reminds me of a slick version of Glenn Hauser's "Review of International Broadcasting." The bulletin gives very heavy coverage to alternative radio programming, most of which is heard on shortwave. All issues contain some coverage of pirates and clandestines, including information from European clandestine expert Mathias Kropf. The main downside of this interesting publication is that it is written in German. If the language barrier is no obstacle for you, subscriptions with airmail delivery are available for 59 German Marks. Write to Radio Von Unten, Verlag Rainer Pinkau, Weender Strasse 30, 37073 Göttingen, Germany.

ZÜNDEL

In the November ACE I solicited comments on whether Ernst Zündel's "Voice of Freedom" can be properly characterized as far right and/or fascist. ACE member Harald Kuhl of Germany writes in to report that he repeatedly heard Zündel's now defunct German broadcast that formerly was on the schedule of WWCR. Harald confirms from this old program that "there's absolutely no doubt that this guy spreads fascist ideas and views."

Two other sources who requested anonymity, both inside and outside ACE, remind us that Zündel has been kicked off other stations besides WWCR. We previously mentioned in ACE that Zündel had to switch his relay network that carries his satellite TV program. A similar controversy is currently ongoing in Europe as Zündel attempts to secure a satellite feed for that continent. Zündel is also running into some obstacles as he makes plans to extend his shortwave radio coverage. He has been rejected so far by stations in at least three countries during attempts to establish radio programming relay relationships: Italy, Equatorial Guinea, and the UK.

Your comments on Zündel's clandestine broadcasting are still very welcome. My own judgment is that he is clearly to the political right of stations like the Voice of Tomorrow and American Dissonant Voices, believe it or not.

CAIMAN CONTEST

Every once in a while I receive an inquiry about an address for Radio Caiman. I got multiple requests at the Atlanta Monitoring Times convention. The latest issue of Gerry Dexter's "Clandestine Confidential" newsletter once again summarizes the unfortunate situation that still prevails. Even though the station has operated with a fine 31 meter signal for many years, nobody has ever uncovered firm details about the station's address or sponsoring organization. The conventional wisdom in DX circles has long maintained that Radio Caiman is probably an anti-Castro operation of USA intelligence agencies, but no absolute documentation of this has ever surfaced in public.

I had some interesting conversations with Cuban clandestine expert John Santosuoso when he turned over the Monitoring Times "Outer Limits" column to me. John claims that he owns the only Radio Caiman QSL that was ever issued, but he is understandably vague about the details behind his acquisition of this unique item. The rest of us still list Caiman in the generic "mystery" clandestine category.

While this is a long shot, I have decided to make a public offer. If you uncover a bona-fide address for Radio Caiman, and if you send it in to ACE for publication in this column, I offer a prize: one year subscriptions to both "The ACE" and "Monitoring Times". If you already subscribe to either or both, I'll extend your subscriptions for 12 months. This prize is being funded out of my own pocket, not out of the ACE treasury or Bob Grove's wallet.

I unfortunately am afraid that this contest will not do much good, but you now have some motivation to get involved in detective work. When you find an address, send it in!

SANGEAN

I received an unsolicited and highly unusual promotional package that appears to have come from the Sangean Company in South El Monte, California. The package contained a nice set of portable headphones that can be folded and stored in a plastic box that is about the size of a cassette tape case. Two tiny earpiece-style headphone microphones were also included, as were two plastic box antenna connector assemblies for attaching longwire antennas through portable receiver antenna jacks. The package contained only one piece of printed material: a quote from the April 13, 1992 issue of "Forbes" magazine. The very strange two paragraph Forbes piece discussed people who claimed that their minds are controlled by radio waves, claiming that the controllers were at the CIA or the FCC.

I thank whoever sent me the nice collection of equipment accessory samples, but I am still scratching my head in puzzlement about the FCC/CIA mind control article. The package was postmarked in California at the actual location of Sangean and stamped with the company's actual return address, but there was no literature enclosed from Sangean. Hmmm.

THANKS

This month we thank the following for their direct input to the column: Sangean America Inc. (I think), Rob Keeney (Kansas), John Herkimer (New York), Kirk Trummel (Missouri), Vince Havrilko (Germany), Eric Suter (Virginia), Mike Hardester (North Carolina), Harald Kuhl (Germany), two anonymous reporters, and George Zeller (Ohio). Next month we all hope to hear from YOU by December 18 for the first Clandestine Profile column of 1994!

In contacting a free radio station:

Whenever an address is announced, use it. If no address is announced use the address listed here. In a pinch, write to one of the primary maildrops but don't hold your breath.

Do not expect a 'drop to pay for your QSL; enclose adequate postage (three mint first class stamps) for forwarding and reply. Do not send a SASE unless specifically requested by the station. Outside the USA enclose some IRCs; if no IRCs are available, send a dollar or two.

Announcing a maildrop is not a guarantee of response; don't blame the 'drop if you never hear from the station. 'droperators are not QSL Managers, they only handle mail. Broadcasters should keep their promises.

Avoid asking about location; it's a dumb question that Operators only answer to mislead correspondents. Most, however, will answer questions about power or equipment, and appreciate your technical observations, bandscans and cassette recordings.

... - - . - - .. ---

If you operate and desire audience contact, use a maildrop for some security. The open 'drops are:

Thanks to all who contributed this month, especially in the HUGE DiaLogs column! There sure were a lot of different stations on over the Halloween weekend and a few of them made it to Kansas.

My apologies to everyone for the quality of the printing in the A*C*E last month. This was in no means the fault of our printer. My copier at work was on the blink and was spitting out substandard copies. It seems to be better this month.

I am holding some newspaper clippings and other filler-type material that was sent in and I will hopefully be able to get it all in next month. I cut the bulletin off at 28 pages when Andy's column did not arrive in time. I had a bad feeling about the deadline here at Pub. HQ and Thanksgiving coinciding. Remember: If you are sending anything in for the bulletin, please send it to me directly, either by mail (10315 Antioch, Overland Park, KS 66212-4332) or e-mail on the ANARC BBS (913-345-1978). If you are sending in renewals or address changes, use POB 11201 so Kirk can update the membership database.

That's a wrap on this issue.

The A*C*E is an association of individuals who find pirate, clandestine and covert communications an interesting part of their radio listening hobby. The primary existence of the club revolves around the publication of a monthly bulletin, The A*C*E. The bulletin reports on pirate, clandestine, covert and other unexplained broadcasts. Also, the readers are provided with other available material concerning motives, explanations and theories behind these various broadcasts and broadcasters. The ACE as an organization, does not encourage, support or condone any illegal activity; we simply seek to understand the nature and reasoning behind such broadcasts. If your interests include listening to pirate radio stations, clandestine broadcasts and covert communications, The A*C*E is for you!!
